

Part 1: Model Answer

What public transport facilities are there in your city?

Well, we've got a bus system - although it tends to be quite slow and **crowded**. There's also a tram line. The trams are **modern** and comfortable, but they only really go from the city centre to the airport. Finally, there are trains, but these are used more for long journeys rather than inner-city travel.

Useful language

Well-connected

Covers many areas, making travel easy between different places.

*"The transport system is **well-connected**, so you can easily travel across the city."*

Punctual

Always on time.

*"Trains here are very **punctual**; they rarely run late."*

Affordable

Not too expensive.

*"Public transport is **affordable**, making it accessible for everyone."*

Modern

Using new technology or updated features.

*"The transport system is very **modern**, with digital screens and contactless payment."*

Crowded

Too many people, making it uncomfortable.

*"The metro is always **crowded** during rush hour."*

Poorly maintained

Not well taken care of; often broken or in bad condition.

*"Some buses are **poorly maintained**, with broken seats and dirty floors."*

Unreliable

Not consistent; often late or not functioning properly.

*"The bus service is quite **unreliable**; sometimes it doesn't show up at all."*
